

PROHIBITIONISTS TO START "DRIVE" UPON WASHINGTON

Program All Ready for Congress Session Which Begins December 3

(Special Star-Bulletin Correspondence)
WASHINGTON, D. C., Nov. 26.—The opening gun for the achievement of nationwide prohibition has been fired. It is intended to abolish the manufacture of beer along with whiskey and other spirits. A program has been formulated which will be pressed for execution at the session of congress, beginning December 3.

The Anti-Saloon league held two big mass meetings here in launching its program for nationwide prohibition. W. J. Bryan addressed a crowd that filled Poli's theater. The overflow was so large that he delivered a second address on the south steps of the treasury. Wayne B. Wheeler, secretary of the legislative committee of the league, outlined the coming prohibition campaign.

The program is:
Repeal of the provision in the food control act leaving the use of foodstuffs in beer to the discretion of the president and absolute prohibition of beer.

Passage in the house of the senate resolution submitting a constitutional amendment for nationwide prohibition to the several states.

W. J. Bryan added a third feature for the program.
"Pass a law putting everybody in uniform," he said, "and you will have nationwide prohibition at once." He was referring to the law forbidding the sale of intoxicants to soldiers in uniform.

The meetings were in celebration of a "dry" District of Columbia. Secretary of the Navy Daniels presided. "I like the atmosphere of Washington and the odor of it," declared Bryan. "It now has more of the grape juice flavor than I have ever known it." He declared that the first week of prohibition in the District had shown a marked decrease in crime over the first week in October. "The arrests from drunkenness," he said, "have been reduced from 226 the first week in October to only 16 the first week after prohibition went into effect."

Secretary Daniels said Washington is the first national capital to take this step for prohibition. "I hope that we may live to see the day when no capital on earth shall suffer the curse of liquor in its midst," said he. "Congress had the wisdom and the grit to get the idea that if a man shoots straight he must think straight, and see straight and must be clean. Therefore it passed the law that no liquor can be sold to soldiers in uniform."

"We have captured the political heights," Bryan said, "and now we must see to it that prohibition is brought to the rest of the nation. It is a great thing that two-thirds of the members of congress have agreed upon the righteousness of driving out the saloon from our midst. When the constitutional amendment is placed before the people it will be carried. Ohio will be one of the states that will vote for it. Even if we have lost that state to the 'wets' we have won a great victory there, for when the question was voted on before in that state the majority for the saloon was 84,000."

Mr. Bryan said that no greater aid could be given the soldiers than keeping liquor from their midst and that this would help to win the war for democracy. "We are fighting," he continued, "to establish the principle of democracy in the world. Democracy means that it is the part of the people to rule. The right of the people to rule is the voice of the majority in making the laws. While the war is on I believe it is the duty of the citizens to support the government in every way."

Mr. Bryan declared that the conservation of foodstuffs is one of the greatest arguments for preventing their use in beer.

Secretary Wheeler said the senate resolution to submit the constitutional amendment was sidetracked in the house because a few, on the plea of patriotism, threatened to block the food law if beer was abolished.

ADMIRAL COWLES TAKEN BY DEATH

Word was received yesterday of the death of Rear Admiral Walter C. Cowles, U. S. N. (retired), at Redlands, Cal., following an illness of a week. Rear Admiral Cowles was formerly commandant of the Honolulu and Pearl Harbor naval station. In March, 1913, he relinquished this post. During that time he brought the construction work at Pearl Harbor to the point where it was receiving attention as the leading naval construction work of the world.

Admiral Cowles was born in Farmington, Conn., July 11, 1853, and was graduated from the naval academy in 1873. He commanded a number of battleships on the Atlantic, Mediterranean and Pacific oceans. He commanded the receiving ship Hancock, New York harbor, prior to coming to Honolulu, and after leaving Pearl Harbor he was given command of the Pacific fleet.

MORE LIEUTENANTS ARE COMMISSIONED

On cable authority from Washington orders have been issued from department headquarters giving provisional commissions as second lieutenants to Frank Romane Schucker, Joseph Atherton Richards and Harry Morris Brenga. Lieut. George Clark, signal corps, is directed to proceed to Camp S. B. Morse, Texas, for duty. Second Lieut. William Moe, signal corps, is directed to join the 3rd Field Battalion, Fort Kamehameha.

PUA BELIEVES BILNUEVA IS GUILTY PARTY

Scouts Story Related By Antonio Garcia and Wants Him Taken to Hawaii

(Special Star-Bulletin Correspondence)
HILIG, Nov. 26.—As far as is known at the present moment nothing has been done in the way of accepting the governor's invitation that two representative men of this island proceed to Honolulu and there interview Antonio Garcia, the man who claims that he murdered Hattie Kunene in the Kohala district a year or so ago. Governor Pinkham absolutely declines to allow Garcia to be brought to Hawaii. The chief executive declares that any such proceedings would be a dangerous one. It is understood that the attorney general looks upon the matter in the same light.

Garcia is condemned to hang on November 30 for the murder of a Japanese at Honolulu early in this year. He confessed to the murder of Hattie Kunene and also another murder in the Philippine Islands, before he came to Hawaii.

"Of course I don't want to see an innocent man hanged or imprisoned for life," said Sheriff Samuel Pua. Continuing the sheriff went on to say that he believed Jose Bilnueva to be the man guilty of the outrageous murder of Hattie Kunene and that Antonio Garcia, who claims that he committed the terrible crime, is lying when he makes such a statement. "I am convinced that in Jose Bilnueva we have the right man," declared the sheriff, "and I am convinced by the fact that all of the witnesses who testified against Jose at the trial still stick to their stories without a break."

"Garcia's story regarding the murder is a most improbable one. He declares that the girl went willingly into the cane field with him and that, later on, she asked him to kill her as she had been dishonored. Then Garcia had stated that certain wounds were inflicted on the body of the girl. In these statements he is wrong to a certain degree. He also got mixed up when he was questioned about the hat the girl had on at the time and also about the kind of lei there was around the hatband. This goes to show that he did not quite get the story right from whoever prompted him to declare that he murdered Hattie Kunene."

"There are many discrepancies in Garcia's story and the real way to discover if the man is lying or not would be to bring him to this island, turn him over to me as a prisoner and allow me to take him to the Kohala district, there to have him point out the exact spot of the crime he says he is guilty of. All the rough drawings that Garcia has made while in prison are valueless because, as he used to work in the Union mill at Kahala, he would probably be aware of the general locality in which the murder was committed. No doubt hundreds of people have viewed the place since the commission of the horrible crime."

Wong Goon Let, local Chinese who lost an appeal from a federal court decision sentencing him to serve nine months in prison for committing a statutory offense, was arrested by Marshal J. J. Smiddy yesterday afternoon and will be required to serve his sentence. The arrest was made on the strength of a mandate issued by the court of appeals of the ninth circuit, California.

DRINK HOT WATER IF YOU DESIRE A ROSY COMPLEXION

Says we can't help but look better and feel better after an inside bath

To look one's best and feel one's best is to enjoy an inside bath each morning to flush from the system the previous day's waste, sour fermentations and poisonous toxins before it is absorbed into the blood. Just as coal, when it burns, leaves behind a certain amount of incombustible material in the form of ashes, so the food and drink taken each day leave in the alimentary organs a certain amount of indigestible material, which if not eliminated, form toxins and poisons which are then sucked into the blood through the very ducts which are intended to suck in only nourishment to sustain the body.

If you want to see the glow of healthy bloom in your cheeks, to see your skin get clearer and clearer, you are told to drink every morning upon arising a glass of hot water with a teaspoonful of limestone phosphate in it, which is a harmless means of washing the waste material and toxins from the stomach, liver, kidneys and bowels, thus cleansing, sweetening and purifying the entire alimentary tract before putting more food into the stomach.

Men and women with sallow skins, liver spots, pimples or pallid complexion, also those who wake up with a coated tongue, bad taste, nasty breath, others who are bothered with headaches, bilious spells, acid stomach or constipation should begin this phosphate hot water drinking and are assured of very pronounced results in one or two weeks.

A quarter pound of limestone phosphate costs very little at the drug store but is sufficient to demonstrate that just as soap and hot water cleanses, purifies and freshens the skin on the outside, so hot water and limestone phosphate act on the inside organs. We must always consider that internal sanitation is vastly more important than outside cleanliness, because the skin pores do not absorb impurities into the blood, while the bowel pores do.—Adv.

DRAFT RULES FOR HAWAII NEED REVISION

Conditions peculiar to Hawaii will require that draft regulations recently prescribed from Washington for the next call will have to be worked over to a considerable extent.

This is the statement of Maj. F. J. Green, officer in charge of draft work, who plans to visit the other islands of the group in a short time to determine on a plan best fitted to cover the situation.

One problem that arises is how the matter of medical advisory boards is to be handled, for on some of the other islands the number of doctors is scarce as compared with the number of registrants. The burden that would be thus placed on such a small board would be physically impossible of handling.

Another question is that of interpreting. It has been suggested that the corps of interpreters that worked so efficiently on registration day be used again to get the questionnaires filled out. Major Green has a complete list of these men. He is hoping that the work may be systematized in some way with the plantations on each island as basis for the several districts.
